### **Notes**

#### **02-01 (Don)**

I wonder what prompted the start of the frequent practice of calling Sunday the first day of the week??

#### **11-01 (Don)**

The study of Oct, Nov & Dec 2013 intercepts revealed that there is no fixed period for either the groups with the 5th digit increase or the groups which remain the same. Some interesting observations follow. Such transmissions are what leads to the suspicion that a lot of these are dummy messages.

- Nov 23 there were repeats of 21 Nov groups and on
- Nov 24 there were repeats of 20 Nov groups.
- 4 Dec repeats of 21 Nov groups.
- 5 Dec a repeat of Oct 20th and 22-26 Sept groups.
- 7 Dec repeats of 22-26 Sept groups.
- 27 Dec - 30 Dec 80581, 80582, 80583, 80584. Then on 2100 sked changed to 56792.
- 31 Dec - 7 Jan remained 56792.
- 8 Jan 80587. So sometime between 30 Dec and 8 Jan 80585 and 80586 were sent.

#### **30-1 (Don)**

Also your attention is directed to five of the groups having the 5th digit increase by 1 and a new group for group 2.

Well they have done it again. The use of the 83381 sequence dates back to September when the sequence was repeated 16-21 Sept. There was a group change on 22 Sept but on 24 Sept it was back and forth with 83381 and 56801 sequences. On Sept 27 back to the 83381 groups and by 1 Oct the groups had been changed. This practice just convinces me that a good deal of the traffic passed is DUMMY Traffic.

## UTILITY ROUND-UP

### **Unid stations**

A spoof or the real thing?? A friend of RWO copied a unid station. I copied the station the next day. No reports after that. It sounded somewhat amateuristic but that was also the case with EV01 in the past. So, what is it? I am pretty sure that it is an amateur station fooling around.

The transmissions were heard on 14340 kHz, 08-01, 1515, 1545 and at 1600 UTC and on 10115 kHz at 2300 UTC. Also on 14340 kHz, 09-01, 1518 UTC

Les copied the following station. Most probably an amateur but the odd thing is that it has been heard on various days and times with similar transmissions.

## **Unid 10-minutes network**

JPL, Token and Attu copied the 10-minutes net. It is a pity that we still do not know where the signals come from. The net is on the air for at least 10 years !!!
