FOREWORD

I visited the **Secret Communications 4** exhibition in Duivendrecht, Netherlands, which was very interesting and enjoyable. The exhibition was organised by the [Crypto Museum](#) and the [Foundation for German Communication \(CDV&T\)](#). Many thanks to Crypto Museum's Marc and Paul for the organisation, excellent explanation and the great stories. I have included some pictures of the event. You can still visit the exhibition on 17 December. More info: <https://www.cryptomuseum.com/events/2023/sc/index.htm>. Be sure to read the article about the Rubicon investigations. See <https://www.cryptomuseum.com/intel/cia/rubicon.htm> for the full story.

The Russians were very active with a lot of F06 traffic. M23 also showed up and disappeared again. It was joined by UM05 another unid French station that was active throughout the month. HM01 was silent in November.

Due to family circumstances I had no time to edit all logs, which result in ca 200 duplicates. Lack of time is also the reason why N&O is late. I expect that the January edition will either be very late or it will be a Jan/Feb combination.

Test transmissions

At the same time as M14, E06 appeared on 10755 kHz: with a similar pattern, super long callup then truncated message. Not only did these tests happen concurrently, which isn't how it's usually done: tests on different frequencies are normally sequential, the transmitter tuning to the next frequency when it's done with the previous transmission. But they were in fact pretty much synchronized, starting the message and then cutting off the transmission at the same time. (PY)

The 2023-11-10 0400z transmission had a mishap: it was interrupted in group #39, then 4m50s of silence ensued while the transmitter remained up, followed by a 1200Hz test tone then 361 R1m before resuming the message from group #27 until the end. (PY)
