Numbers & Oddities <http://www.numbersoddities.nl>

"Numbers & Oddities" a.k.a. the "Spooks Newsletter" is a newsletter for the members of the Utility DXers Forum (UDXF), the Spooks mailing list, HF Underground and everyone else who is interested in Numbers Stations.

"Numbers & Oddities" covers the fascinating world of Numbers Stations and other odd radio signals on shortwave.

It is with shock and deep sadness that we share the passing of Webweasel, a founding member of the Priyom community. He died in hospital earlier this September, of pneumonia, at the age of 44.

While Webweasel had stepped back from active shortwave monitoring in the past years, I would like to reminisce the legacy he took part in building by quoting from Priyom's mission statement page: "to drag the radio listening community online and into the 21st century (kicking and screaming if needed)". Webweasel was a warm, engaging host for our old early days podcast, and a kind, patient, and endlessly helpful presence outside of it. A professional web system administrator by trade, he was key in getting the Priyom.org website off the ground; he remained a steadfast support and provider for it, even long after he'd withdrawn from the hobby itself.

Webweasel is survived by his 22 yo son and 20 yo daughter. A funeral service will be held on September 24th in Kent, UK. For further details or to share memories, please contact edk_thompson@yahoo.co.uk

Rest in peace, Webweasel: your legacy lives on in the hobby.

Russian operator 7 sent a large number of test/training messages in various formats. We heard M12, XPA2, XPB1, P07 variants and F07 variants. They sure kept us busy.

As so often, M14 experienced problems. But that makes it fun to listen too. You never know what will happen.

Putin's ears within Europe: Uncovering Kaliningrad's Hidden Antenna Array

Andrea IW0HK posted an interesting tip on X. Thanks for that.

Deep within a dense forest in the secluded Kaliningrad Oblast, just 25 kilometres from the tranquil countryside along the eastern border of Poland, a massive construction site is located at coordinates 54.562160, 21.827560. This site caught the attention of open-source researchers at Tochnyi due to its unusual geometry, impressive size, remote location and potential strategic significance – and we therefore conducted an assessment using available satellite information. In this article, we aim to provide a clearer understanding of what this installation might be, by analysing satellite imagery, conducting comparative studies and reviewing historical data related to signals intelligence infrastructure.

ATTENTION ALL INTERCEPT OPERATORS! Crypto Transmission from KPH, Saturday August 30, 2025 @2000Z

The year is 1939. War looms over Europe like a gathering storm. And deep within the quiet halls of a remote country estate, a small, secretive group of the Allies' brightest minds works tirelessly to pierce the veil of the German military's most complex encryption device - the Enigma machine. In just three weeks, a critical radio transmission is expected to be sent in Morse code: a stream of meaningless five-letter groups, indecipherable to ordinary listeners but believed to contain plans of the highest importance. Intelligence believes the message may detail the movement of German forces in a way that could change the course of the war before it has even truly begun.

*In a daring operation that cost brave agents and precious resources, a codebook has been wrestled from enemy hands. It is stained, scarred by fire...and perhaps incomplete, but it is the best chance we have. You are now part of the small team entrusted with this task. The clock is ticking; every day that passes brings the transmission closer, and once it arrives, you must work with speed and precision to decode its secrets. **The fate of ships at sea, soldiers in the field, and***

perhaps the fate of nations rests in your hands.

Time is of the essence - crack the code before it's too late!

The Enigma Transmission

The MRHS in cooperation with our crypto experts at the Cipher History Museum <link: <https://cipherhistory.com/>> have arranged to transmit the Enigma message via the facilities of coast station KPH on Saturday August 30, 2025 at 2000Z.

KPH listeners, intercept operators and code-breakers everywhere are invited to try their hand at receiving the transmission and decrypting the message. Certificates will be awarded for proof of successful decode, first to decode and use of original or replica hardware.

You say your Enigma hardware is a bit rusty? Perhaps your Bombe is not fully operational? No problem, MRHS has you covered! Software simulations exist for the Enigma code machine. Click Here <link: <https://www.101computing.net/enigma/>> for an easy-to-use Enigma simulator. It is web-based, no download necessary.

For additional information on the Enigma please see Ralph Simpsons' Cipher Museum History site <https://cipherhistory.com/enigma>

Crypto broadcast date, time and formats

The Enigma broadcast will commence at 2000Z (1300 Pacific) on 30 August 2025 on all KPH CW frequencies. The CW frequencies are (in kc): 425.0, 6477.5, 8642.0, 12808.5, 17016.8, and 22477.5 . Upon completion of the CW transmissions, the broadcast will be repeated on the KPH RTTY frequencies at 2015Z. The RTTY transmission will be 170cps shift Baudot, 45 baud. The RTTY frequencies are (in kc): 6324.5, 8427.0 and 12585.5

Costas received the message on 12808.5 kHz over a WebSDR in the USA:

Note: Wow!! Six units addressed in one message, this is fascinating. Notice how all the first groups of each message begin with numbers that are multiples of 3, and how four of the units have messages starting with groups beginning with 6. This transmission lasted 25 minutes and is the second longest standard format/non V13a transmission I've intercepted. I wonder if it's the start of a larger scale mission, or agents that were training with V13a now working in the field.

Note: station 3 reverted back to its normal format, with only three of the previous units addressed (0347, 5260, and 9925) and the

usual total of three messages. Maybe they sent two weeks' worth of messages by accident.

Test/training schedules

The following M12 tests all used known frequency cycles and associated IDs from the fixed frequency pool. Furthermore, they used descending cycles starting at 1400z with the one featuring the highest frequencies available in the pool, then the second highest cycle at 1500z, then the third then fourth one.

P07 variant (classic 2-minute 1600/2100Hz callup, 4 OFDM channels, 1375/1500/1625/1750Hz subcarriers), 1 block

This variant used the DP01-style callup, but also featured 4 channels - something never seen before with this modem as far as I know – instead of 8 channels in production or 2 channels sometimes in tests.

---------------------------------------	---

Unid pirate station on 24 and 26 August.

Joint monitoring effort by Chris Smolinski, Rycat, linkz, PY, and Ringo

6935 kHz, 24-08, 2024 UTC, AM, i.p.

Unpaired 5FG, female voice in English, sultry tone, "repeat" and "count 100", short music at the end

6945 kHz, 26-08, 0147 UTC, USB, i.p.

Unpaired 5FG, female voice in English, sultry tone. The message ended with:

48001 68477 4112 5 37423 45442 43710 75390 77744 99206 95517 02761 8386

TDoA pointed to the US northeast. Her voice certainly makes you think of those late night TV commercials for sex phone lines, before the internet existed!
