Intelligence gathering systems

ACINT: Acoustic Intelligence. Intelligence resulting from collection and processing acoustic phenomena.

CLASSINT: Classified Information Intelligence; information from military networks and partners.

COMINT: Communications Intelligence. Eavesdropping on (wireless) communications.

CYBINT: Cyber Intelligence; gathered from cyberspace.

DNINT: Digital Network Intelligence; gathered from cyberspace.

ELINT: Electronic Intelligence; gathered from electronic signals that do not contain speech or text.

GEOINTL*:* Geospatial intelligence; gathered from satellite, aerial photography, mapping/terrain data.

FININT: Financial intelligence; gathered from analysis of monetary transactions.

FISINT*:* Intelligence derived from the interception, processing and analysis of telemetry from missiles and other remotely monitored devices.

HUMINT: Human intelligence; gathered from a person on the ground.

IMINT: Imagery Intelligence; gathered from satellite images and aerial photography.

FORENSIC INTELLIGENCE: Intelligence resulting from collection, and analysis of scientific evidence during the course of an investigation.

MASINT: Measurement and Signature intelligence; including
   – Electro-optical MASINT
   – Hyperspectral Imagery MASINT
   – Nuclear MASINT
   – Geophysical MASINT
   – Radar MASINT
   – Materials MASINT
   – Radiofrequency MASINT

MEDINT: Medical Intelligence resulting from collection, evaluation, analysis, and interpretation of foreign medical, bio-scientific, and environmental information.

OSINT: Open-source intelligence; gathered from open sources.

SIGINT: Signals intelligence; gathered from interception of signals.

TECHINT: Technical intelligence; gathered from analysis of weapons and equipment used by the armed forces of foreign nations, or environmental conditions.

TELINT: Telemetry Intelligence, now FISINT. Intelligence derived from the interception and processing and analysis of telemetry.
